

# FT-4

Pilotless Ignition Unit

The **FT-4 Ignition Unit** is a dependable **pilotless burner** assembly designed for **fired equipment applications rated at 500,000 BTU/hr.** Engineered for consistent ignition performance, the FT-4 delivers stable, pilotless operation to ensure safe and reliable main burner ignition across a range of field conditions.

## Features

- Hot surface ignition
- Gas Inlet: 2-Inch NPT
- Stainless steel nozzle
- High-grade aluminum body
- Flame sensing via flame rod or thermocouple

## The SureFire Difference:

- ✓ Eliminates pilot burner requirements
- ✓ Eliminates spark ignition systems
- ✓ Reduced maintenance requirements
- ✓ Direct circuit board termination
- ✓ Patented nozzle design
- ✓ No ignition coil required

# APPLICATIONS

**Heater Treaters**

**Separators**

**Tanks**

**Dehydrators**

**Line Heaters**

**Fired Equipment**
