

# Actuator Valve

The SureFire Actuator Valve is a NEMA 7-rated rotary electric actuator engineered for hazardous location service with torque requirements up to 200 in-lbs.

## Specifications:

|                        |                                                        |
|------------------------|--------------------------------------------------------|
| <b>Torque:</b>         | 200 in-lbs                                             |
| <b>Cycle Time:</b>     | 15 - 90 second open<br>05 - 90 second close            |
| <b>Current Rating:</b> | 12 VDC, full load 1.3 / Lock Rotor 4.2                 |
| <b>Certification:</b>  | CSA Master Contract 178618                             |
| <b>Location:</b>       | Hazardous - Class I, Division 1 & 2, Groups E, F and G |
| <b>Voltage:</b>        | 12 VDC                                                 |
| <b>Approved Temp:</b>  | -4F to 150F                                            |
| <b>Coating:</b>        | Thermally bonded polyester powder                      |
| <b>Weight:</b>         | 15 lbs                                                 |
| <b>Lubrication:</b>    | Grease, permanent, little or no maintenance required   |
