

FT-2

Pilotless Ignition Unit

The FT-2 Ignition Unit is a dependable pilotless burner assembly designed for fired equipment applications rated at **125,000 BTU/hr.** Engineered for consistent ignition performance, the FT-2 delivers stable, pilotless operation to ensure safe and reliable main burner ignition across a range of field conditions.

Features

- Hot surface ignition
- Gas Inlet: 1-Inch NPT
- Stainless steel nozzle
- High-grade aluminum body
- Flame sensing via flame rod or thermocouple

The SureFire Difference:

- ✓ Eliminates pilot burner requirements
- ✓ Eliminates spark ignition systems
- ✓ Reduced maintenance requirements
- ✓ Direct circuit board termination
- ✓ Patented nozzle design
- ✓ No ignition coil required

APPLICATIONS

Heater Treaters

Separators

Tanks

Dehydrators

Line Heaters

Fired Equipment
