

FTL-F MINI UNITS

The FTL-F Series ignition unit is engineered for continuous pilot operation in Combustor applications. By utilizing flame front generation technology, critical ignition components are relocated away from the extreme combustor environment, significantly enhancing system reliability and service life.

Features

- Piloted
- Suitable for Combustors
- Gas Inlet: 1/4-Inch NPT
- Custom Engineered Design
- Flame Sensing with Thermocouple

The SureFire Difference:

- ✓ Eliminates spark ignition systems
- ✓ Elimination of manual ignition
- ✓ Reduced maintenance requirements
- ✓ Patented system design
- ✓ No ignition coil required
- ✓ Flame front generation technology

APPLICATIONS

Combustor
